Re: Security System Installation

The Town of Raymond is pleased to offer this letter of reference of Securcom. Chris and his team act as professionals in their field without hesitation. The Town deals with significant public interaction in all our facilities and spaces. Securcom has installed and enabled us to have excellent video surveillance and monitoring systems in our administration building, public works shop & transfer station, aquatic centre and our modern water treatment centre.

The value of these assets is critical for us, and we feel confident with the work they have done. We have modern tools to enable our team to access important information wherever they may be any time of day. They provided excellent advise and worked within our budget

They have done an excellent job in supporting us when issues arise (although that is seldom) and we feel we received excellent value for our investment. We have more jobs lined up for them and are confident these to will be handled in the same excellent manner in which they have been done for the past few years.

S

A handwritten signature in black ink that reads 'Greg Robinson'. The signature is written in a cursive style.

Greg Robinson
